Honolulu, HI 96814

Gentlemen:

It is with great pleasure that I forward this Performance Evaluation and Certificate of Appreciation to your company for outstanding performance under Contract N62742-01-D-1807, Architect-Engineer Services for Environmental Investigations, Permit Applications and Related Studies for Water, Sewage, Wastewater (Domestic, Industrial) and Storm Water Systems at Various Navy & Marine Corps Activities, Pacific Basin and Indian Ocean Areas.

Your firm demonstrated exceptional dedication, flexibility, and responsiveness in responding to the Fena Water Treatment Plant water production problem in Guam. Your engineers were on-site within 72 hours of COMPACFLT's request for assistance providing recommendations needed to re-establish the Navy's water production capability. These recommendations provided the foundation for long-term improvements at the reservoir and treatment plant which will lead to an overall increase in treatment system reliability. We would especially like to commend Mr. Myron Nomura of your firm for his exceptional professionalism and technical expertise in support of this critical project. His efforts are a positive reflection of the consistently high quality and responsive delivery of engineering services received from your firm.

Your firm is congratulated for these significant achievements.

Sincerely,

G.A. ENGLE
Captain, CEC, U.S. Navy
Commander
